AI Platform Crafted in Palo Alto

Palo Alto keeps your team's work on-brand, on message, and on time. Innovation with AI.

[Start for free](#)[Demo Sales →](#)

The screenshot displays the Palo Alto AI Platform's user interface. On the left, a sidebar shows a profile picture of Samantha and her email address, samantha@email.com. It also includes links for Dashboard, Projects, Tasks, and another Dashboard. The main area has a dark background with light-colored cards. The first card, 'Overview', shows financial metrics: Total revenue \$53,00989 (12% increase from last month), 95 projects (10% decrease from last month), Time spent 1022 /1300 Hrs (8% increase from last month), and Resources 101 /120 (2% increase from last month). Below this is a 'Project summary' table with two rows: Nelsa web developement (Completed, 100%) and Datascale AI app (Delayed, 38%). To the right is a 'Overall Progress' section with a gauge showing 72% completion.

The screenshot displays a user interface for a project management and collaboration platform. On the left, a sidebar lists four main sections: 'AI Platform' (with two 'ONLINE' status indicators), 'Realtime Reports', 'Collaboration', and 'Team Access'. The 'Realtime Reports' section is expanded, showing a 'Dashboard' tab. The main area is a dashboard for a user named 'Samantha' (samantha@email.com). It includes an 'Overview' section with metrics like Total revenue (\$53,00989), Projects (95 / 100), Time spent (1022 / 1300 Hrs), and Resources (101 / 120). Below this is a 'Project summary' table with rows for 'Netra web developer', 'Datascale AI app', 'Media channel', 'Cortex iOS app dev', and 'Website builder development'. A 'Watch demo' button with a video thumbnail and timestamp (03:54) is overlaid on the dashboard. Further down are sections for 'Today task' (with a list of items like 'Create a user flow of social application design' and 'Landing page design for Fintech project of singapore') and 'Projects Workload' (a circular chart showing workload distribution among team members like Sam, Meddy, Ken, Dmitry, Vega, Kadija, and Meim).
